Tech specs

Azur 340T FM/AM RDS radio

Cambridge Audio builds on its award winning tuner pedigree with this fully featured and versatile design.

Building on the success of the award-winning Azur range, the 340T is a highly specified FM / AM RDS tuner. An ideal companion to the 340A (amplifier) and 340C (CD player) the new 340T is a highly impressive, entry level separates tuner offering incredible value for money.

Available in black or silver, the 340T sits on the

customary solid metal Azur chassis and features a robust aluminium front panel. This is complemented by an aluminium-faced remote control.

With 20 presets per band, an RDS interface to display station names and a clock with wake-up alarm, the 340T punches well above its weight in this important category.
